About Damon Industry

One of the global leading manufacturer of brake rollers / speed controllers

Damon Industry provides ten thousands of brake rollers all over the world every year for many industries. With professional experience for decades, Damon Industry provides support for global companies to achieve efficient logistics.

We provided two series of brake roller products (internal and external) over ten years. Our customers applied our brake rollers (speed controllers) to gravity racks in different projects. We received good feedback of stable and reliable performance from our users for years.

We constantly update and improve the design and components based on customer' s feedback and on-site analysis. We can provide not only the medium and heavy models for 200-1500kgs pallets, but also light models for 10-100kgs applications.

Globally we have gained the consistent trust of our customers. Damon industry will strive for meeting more different requirements and supplying good products in future.

Brake rollers in gravity racks, also known as speed reducers / speed controllers, mainly for eliminating acceleration of gravity by slowing loaded pallets, helping pallets' steady and smooth movement on racks, to ensure safety of operators and goods.

Self-adaption to different weights, Steady braking force, Maintenance-free, Zero energy consumption.
