

### 2650 Series Curve Conveyor Roller

# 2650 Series Poly-Vee Tapered Sleeve Roller

#### **Product Features**

- Based on the 2250 Series, covered with grey polypropylene taper sleeve; abrasion resistant, low noise, shockproof.
- In the case of sensitive to static electricity, you can choose anti-static tapered sleeve (black), surface resistance value ≤ 10<sup>6</sup>Ω.
- The poly-vee pulley is located on the head end of the roller which separates the drive area and the conveying area avoiding interference between the poly-vee belt and the conveyed goods.
- The bearing end cap consists of a precision ball bearing, a polymer housing and end cap seal. Combined they provide an attractive, smooth and quite running roller.
- The design of the end cap protects the bearings by providing excellent resistance to dust and splashed water.
- ISO9982 PJ series poly-vee. Total of 9 grooves at 2.34mm pitch.
- The duty capacity of the roller depends on the type of poly-vee belt and transmission layout. The weight of single items to be conveyed should not exceed 50kg.
- The roller is light, easy start-up.
- Temperature range: −5°C ~ 40°C.
- Humidity range: 30%~ 90% RH (non-condensation).
  Please contact us if humidity out of this scope.

#### Specifications

Be	arin	g١	Unit	
-				

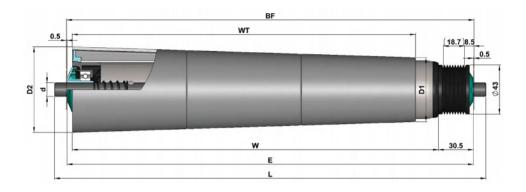

Bearing housing	Polyamide, black			
End cap	Polypropylene, Damon green			
Precision ball bearing	6002			

### Drive Element

Polyamide, black

🧬 Optional Poly-vee belt
